Work Experience

Circle Lead at novu
Oktober 2022 - present

- Facilitated the merger of jkweb and novu from both technical and team perspectives, successfully finding common ground and establish a holocratic environment within the circle.
- Led the development of various web applications for clients.
    - Websites focused on visual design and animation
    - Web-Apps, such as an encrypted cloud drive and a learning platform
    - 3D city maps and 3D tool configurators
- Trained and mentored coworkers.
- Maintained and optimized the frontend and CMS stack.

Full Stack Developer at jkweb
January 2019 - Oktober 2022

- Developed multiple projects for various clients, typically working in teams up to 3 people, with project durations averaging a few months.
- Provided technical support to other teams within jkweb.
- Maintained the company's CMS and frontend stack. Introducing the frameworks eslint, Vue and Tailwind.
- Improved deployment tools and pipelines by simplifying processes and creating efficient toolkits.

Application Developer Apprentice at Credit Suisse
August 2013 - August 2017

- Reworked and optimized PLI programs within the database team to facilitate the replacement of older databases.
- Developed new tests and integrated existing ones within the automated testing team to improve the accuracy of detecting false positives.

IT Contractor at Florentino Ice Cream (Los Angeles, USA)
September 2016 - November 2016

- Created company website and set up hosting an online presence.
- Set up new computers and printers for the office.
- Established new company email accounts and migrated old accounts.

Education

B.Sc. Computer Science in Digital Ideation at HSLU
August 2017 - January 2021

Specialized in Computer Science, collaborating with designers and developers to generate innovative ideas, develop them into products, and test their viability.

During the COVID-19 pandemic, reimagined the traditional "Werkschau" exhibition by creating a virtual museum and presentation platform for fellow students. This project resulted in https://museum.stillh.art, showcasing student work in a dynamic digital space and winning an award on awwwards.

Application Developer Apprentice with BMS at Credit Suisse
August 2013 - August 2017

Completed a foundational training year focused on Java and PL/I, followed by hands-on training directly within Credit Suisse.

In addition to IT coursework, earned the Berufsmaturität (BM) with a specialization in economics, complementing technical skills with a solid understanding of economic principles.

Skills

Languages & Frameworks

JS (TS) / PHP / Java
HTML / CSS / SVG / SQL

Vue (Certified) / Nuxt / Three.js
GSAP / Tailwind / ESLint / Laravel

OAuth / A11y / CI/CD / Ionic

(and more)

Miscellaneous

Game development
UX Research (User stories, paper
proptypes, interviews)
Basic accounting

Tools

Vite / Webpack / Git

Illustrator / Cinema 4D
Unreal Engine / Selenium

Linux / Mac / Windows
Docker / Docker Compose
ElasticSearch / MySQL

Other than work

Most of all I enjoy camping and hiking as a means of leaving my computer behind. Whenever the weather's nice I do really enjoy a swim down the Limmat or Aare.

I also enjoy taking on code challenges like one finds at hackathons, Stackoverflow, or CSSBattle. Besides this, I love teaching others and having discussions, especially since that is how I learned to code.
